Subject: Microsoft Settlement

Dear People of the United States of America:

I felt that the word UNITED be part of what is NOW needed.

Enough is enough, can't the states of this country come to the realization that with the economy in such bad shape that it is today we need unity! We also need a company such as the likes of Microsoft to be left alone! It will be a sure bet that the technology sectors will recover with this company leading the way!

Fed chairman Alan Greenspan has no data and no real answers to help this country to a new economic recovery! The proof has been that he has lowered rates last year 11 times and we still have heard of companies like Ford now getting ready to close down factories to which another 35,000 jobs will be lost. These people that have and will lose there jobs have know class action law suits! Most don't even know what one really is, be it known that when given the choice to sign up to sue a company because it's for the good of the people, ??? this I question and deny my ever putting my name on the dotted line! The lawyer's will make all the money even if they win!

Stand up for what's right, but exactly what has been right in the antitrust case is that Microsoft has surely taken a beating for the most part but unjustly and certainly unfairly by a very bad if not the worst Judge in History to proclaim that Microsoft is a monopoly! Truly Microsoft has been one of best and greatest companies in true innovation of the last century! It has made HISTORY as being a giant in an industry started by others like IBM.

United States of America, we are at war now but with terrorist's for Sept 11, 2001 also has now made HISTORY! We can no longer sit back in this country and fight within ourselves as Microsoft is not the enemy!

I am proud of this country and for which we stand, but right now I'm sorry to say that the time to come together so that this country and our people, many who do not wish to lose there jobs and their sense of self respect need to see a heeling process begin again to this great nation!

At this time, I implore the states that have not settled in the Microsoft Anti-Trust Case to please do so and forget about the term CLASS ACTION in the legal sense. Just to use some ACTION with CLASS and settle so we as a Nation can count on YOU so we can Take care of business where it needs to really be taken care of. Please help our great country and leaders to do their jobs in regards to creating an economic growth for the good of ALL the PEOPLE of the UNITED STATES OF AMERICA.
